# Harbour Craft Premium Fiberglass

- Each mould is made with a select piece of Oak, Cherry, Mahogany & Fir to guarantee the authentic look and feel of real wood
- Enjoy the low maintenance along with unsurpassed durability
- Lock-block is enlarged and reinforced to allow for top-quality door hardware.
- Available in three distinctive styles- Traditional, Rustic & Craftsman.
- Featuring true square edge design and wider stiles provides enhanced security, durability and strength.
- Matching fiberglass door lite frames available - a durable and beautiful finishing touch

**Square edge construction offers an attractive wood door appearance. 4" engineered stiles made from laminated strand lumber (LSL) run the entire height of the door on both the hinge and lock side. This provides high resistance against thermal bowing and offers added security.**

CHERRY - Native to North America, this elegant premium hardwood has been a favorite in high-end homes for centuries. Our Harbour Craft Cherry Fiberglass Doors use patented technology and a unique moulding process to mimic the grain of real Cherry wood grain. Just like the real thing, the Cherry collection delivers the natural luster, beautiful grain and rich glow that Cherry hardwood is best known for.

Suggested list price.

# Harbour Craft Fiberglass - Traditional Mahogany

**MAHOGANY** - The world's premier exotic wood, Mahogany has a wood grain that offers a fine texture and uniform interlocking grain, ranging from straight to curly. Mahogany's classic look complements a diverse range of home styles from traditional to contemporary. Just like a real wood door, the Harbour Craft Mahogany Collection starts with the highest quality hardwoods and utilizes a unique moulding process to ensure that each door embodies the same beauty as its inspiration.

# Belmont Oak Textured Fiberglass

- Top and bottom rails are constructed from rot free composite material
- Door stiles are constructed with engineered 2" laminated strand (LSL) hinge and 4" LSL latch stiles
- Belmont features distinctive and deep high definition moulded door panels
- Polyurethane foam core combined with engineered wood stiles provide superior insulation value and structural integrity

Stiles constructed from LSL material are stronger and more rigid than traditional wood stiles or laminated veneered lumber (LVL). The patented LSL manufacturing process creates a door stile that resists bowing and warping.

# Signature Steel

- Superior rust inhibition and polyurethane foam core
- Top quality 22 gauge galvanized construction offers superior durability and tested performance
- Solid reinforcements ensure that cylindrical hardware is mounted securely

## Adjustable Hinge Prep Options for Steel-Edge Doors

Adjusting the door during normal pre-hanging and installation should not be necessary; as the door leaves the factory with the hinge reinforcements pre-set at correct locations.

During the lifetime of the door it may become necessary to adjust the door due to the normal settling of the house. Having a door with an adjustable hinge feature is the perfect solution.

KNOW THE BEAUTY OF INNOVATION

**See the install video on  
[www.youtube.com](http://www.youtube.com)**

**DURA-FRAME™ is:**  
**Alaskan Yellow Cypress, one of the planet's most durable rot resistant woods, finger-jointed to the bottom of premium pine frame component. DURA-FRAME™ is end-sealed with DURA-SEAL™, and primer coated with DURA-PRIME™, G-M Wood Products' exclusive high-durability coatings, yielding exceptional value and rot-free performance. It's environmentally responsible, renewable, and naturally rot-resistant...no chemicals added!**

One-piece screw provides long life and ease of adjustment

Natural-looking composites

Flush mounted screws provide for tight door bottom-to-rail seal

ImperiSeal™

Solid extruded base

## Imperial Products

by Homeshield

### 5Y Thresholds **OUT-PERFORMS THE COMPETITION**

**A simple solution to meet all of your entry door performance requirements**

5Y Thresholds incorporate the patented Imperiseal technology, a continuous filament that positively seals the adjusting rail to the deck of the sill, thus eliminating any chance of water intrusion through the threshold.

#### Intelligent, Easy-to-Install Design

Precision-engineered rails adjust upward and downward using flush screws, while the rail interlocks with a high-dam aluminum sill for complete, easy-to-achieve protection against air and water infiltration.

- \* 3/16" upward adjustment
- \* 1/16" downward adjustment

- \* Most Natural looking synthetic Oak Grained adjusting rail in the industry
